EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife.

Please see our website for the latest information: <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response>

Regular updates will be posted as they are available.

**Subject:** Question about plume

Hi Shaun, my name is Jonah reaching out from ABC Network News.

I was wondering if you could tell me the current location of the front end of the plume (at 8:30 pm)?

Also, we are hearing reports it is headed toward Lake Powell, UT and the Grand Canyon. Can you confirm this? Do you have any idea how diluted it will be at that point (will it still be visible?)

Thank you for your help,

Jonah Lustig
